Basic Skill Development Training program on 'Computational Biology'

Introduction

With experienced and qualified staff and comprehensive state-of-the-art R&D facilities the institute maintains its leading position in conducting training programs for the personnel from refining, petrochemical, automotive, power and related user industry. More than 8000 personnel from India and abroad have been trained on different requirements.

As per the initiatives taken by the Institute for 'CSIR-IIP Integrated Skill Development Training Programs' applications are invited from eligible Indian nationals for the program on 'Computational biology'.

Our computational facility is equipped with range of tools and software to analyze biological sequences, genome data, identify putative coding genes and model functional proteins.

Objectives & Scope

Introduction to Bioinformatics to extensive hands- on practice in order to selectively enable data scientists/ research scholars to effectively handle and interpret biological data for genome assessment and manipulation.

Contents

- | | |
|---|---|
| <ul style="list-style-type: none"> • Introduction to bioinformatics and biological databases, • Data searches and pairwise alignments, • Molecular phylogenetics, • Comparative genomics, Genome sequencing and assembly, • <i>In-silico</i> gene prediction and annotation, Gene Ontology analysis, | <ul style="list-style-type: none"> • Primer designing for PCR amplification and cloning into host vector for protein expression. • Protein database searching, Sequence analysis, Tertiary structure prediction, Homology modeling, • Structure validation and refinement, Docking and active site analysis. |
|---|---|

After successful completion

You will be able to handle the tools and software that are used in biological sequence analysis, genome sequencing gene prediction, protein modeling and active site analysis.

Pre-requisites

Educational qualification required (Biological area)
B. Tech/M.Tech/M.Sc/B .Pharm/M.Pharm
(those appeared in the final exam can also apply).
20 – 45 years of age.
(Age/qualification relaxation as per Govt. of India Rules/discretion of Director, CSIR-IIP).

Who Should join

Any Indian citizen wish to work and excel in handling biological data for genome assessment and manipulation.

Salient features of the program

- Theory: Practical :: 30 : 70
- Interactive sessions for in-depth knowledge sharing.
- Evaluation of trainees will consist of both Theory & Practical component.
- Certificates will be awarded on successful completion of the training.
